

THE HEAVENS DECLARE

IN THE BEGINNING GOD CREATED THE HEAVENS AND THE EARTH

Genesis 1:1

The Solar System: Mercury

It's the planet closest to the sun, and is the smallest planet in our Solar System. The side of Mercury that faces the Sun reaches 430°C while the side facing away from the sun gets as cold as -170°C. It takes Mercury 88 days to revolve around the Sun, and it takes 59 Earth days to make one day on Mercury. It has no moons, and an atmosphere of helium and sodium. Mercury, though the smallest planet, has the highest density of all the planets.

Did you know? Mercury is so small, it's smaller than most of the moons in our Solar System!

1. Mercury is the _____ planet to the Sun.
2. Mercury has _____ moons.
3. It takes Mercury _____ days to revolve around the Sun.
4. Mercury has an atmosphere made of _____ and _____.
5. Mercury has the highest _____ of all the planets.
